SmartConnector Parser Release 7.14.3.8270.0

These notes list SmartConnectors for which parser changes have been made and describe how to apply this latest ArcSight SmartConnector parser release.

To Verify Your Upgrade Files

Micro Focus provides a digital public key for you to verify that the signed software you received is indeed from Micro Focus and has not been manipulated in any way by a third party.

Visit the following site for information and instructions:

<https://entitlement.mfgs.microfocus.com/ecommerce/efulfillment/digitalSignIn.do>

Note: If a Parser Override was provided, see if the Bug or Feature Request number is included in the Fixed or Enhancements Section. If the number is not listed, do not upgrade the Connector. You can test the upgrade in a STAGE (staging) environment to ensure it works as expected before you upgrade your environment PROD (production).

Supported SmartConnector Version

This parser update has been certified with SmartConnector Framework release 7.14.0.8241.0. Use of this update with earlier framework releases is not supported.

Obtain Parser Release AUP File

ArcSight Marketplace

The monthly ArcSight SmartConnector parser update releases are posted to the ArcSight Marketplace. ArcSight Marketplace is an app store that enables rapid provisioning of your ArcSight SIEM deployment with content updates and trusted security content packages.

An ArcSight Marketplace administrative account is required to download and install the monthly connector parser updates. Browse to the Marketplace at <https://marketplace.microfocus.com/arcSight> to set up your administrative account.

MICRO FOCUS SECURITY COMMUNITY

The monthly ArcSight SmartConnector parser update releases are also posted on the [Micro Focus Security Community](#).

New Component or Version

SmartConnector for	Number	Description
Blue Coat Proxy SG Multiple Server File	CON-18880	Added support for versions 6.7 and 7.x. The File Id field has been mapped as general mapping to all uuid data. The X-ICAP-Metadata is a dynamic content that depends on the configurator, such as Content Analysis header values for ICAP and some other tokens. Hence, additional data is being used for them.
SNMP Unified	CON-22924	Added support for RSA Authentication Manager version 8.3.

Fixed Issues

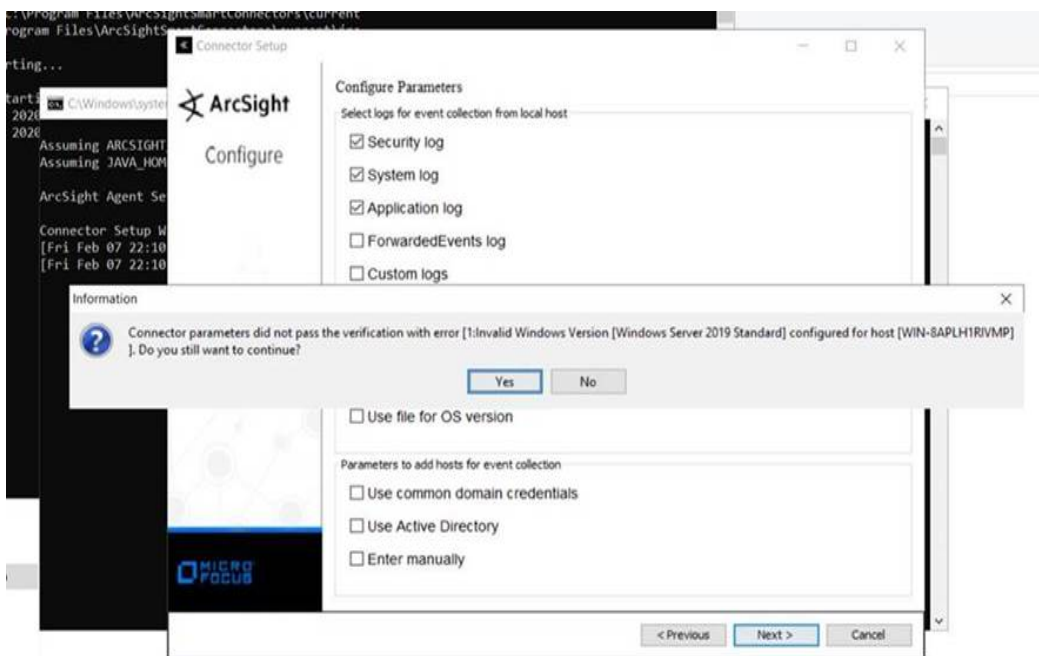

SmartConnector for	Number	Description
Check Point Syslog	CON-23240	The parser was showing ")" at the end of the sourceDnsDomain field. This issue has been fixed.
	CON-23640	The "Install Policy" event was getting errors related to the properties file and omitted AUP category information This issue has been fixed.
	CON-23336	Some R80.10 events were not being parsed. This issue has been fixed.
Cisco IOS Syslog	CON-23787	Some events were not being parsed properly. This issue has been fixed.
Cisco IronPort Email Security Appliance Syslog	CON-22381	Added mapping for version 11.1
Cisco NX-OS Syslog	CON-22266	Some events were not being parsed. This issue has been fixed.
Cisco Secure ACS Syslog	CON-23590	Some events were being received with the "wrong" order on the ciscosecureacs51_syslog, therefore no merging was occurring. This issue has fixed.
Cisco Wireless LAN Controller Syslog	CON-23298	Some events were not being parsed. This issue has been fixed.
Pulse Secure Pulse Connect Secure Syslog	CON-23449	Some events were not being parsed. This issue has been fixed.
UNIX OS Syslog	CON-23519	Some events were not being parsed properly. This issue has been fixed.
VMware ESXi Server Syslog	CON-23297	Some events were not being parsed. This issue has been fixed.

Enhancements

None at this time.

Known Limitations

An operating system compatibility error is displayed when installing the Windows Event Log Native SmartConnector.

Workaround:

1. Start the WINC SmartConnector installation.
2. Quit the installation before choosing the connector from the dropdown list.
3. Upgrade the SmartConnector framework version with 7.14.2 AUP or later.
4. Run the `runagentsetup` file and continue with the connector installation.
5. Run the connector, events can now be viewed on ESM.

[CON-22522]

Connector End-of-Life Notices

SMARTCONNECTOR SUPPORT ENDING SOON

SMARTCONNECTORS SUPPORT RECENTLY ENDED

Support Ended 8/21/2019

Support ended for Oracle Audit DB v9 – end of support by vendor.

[CON-22834]

Support Ended 4/28/2018

Support ended for all 32-bit SmartConnectors – Use 64-bit SmartConnectors.

Updated Configuration Guides

SmartConnector configuration guides for the following devices have been updated for this release and are posted to the ArcSight Connector Documentation page on Micro Focus Software Community at:

Verify Your Upgrade Files Obtained from SSO

After you obtain the parser release file from SSO, and before you upgrade, Micro Focus provides a digital public key for you to verify that the signed software you received is indeed from Micro Focus and has not been manipulated in any way by a third party.

Visit the following site for information and instructions:

<https://entitlement.mfgs.microfocus.com/ecommerce/efulfillment/digitalSignIn.do>

Upgrading to the 7.14.3.8270.0 Parser Release

The following sections document the multiple options for upgrading to this parser release:

- [Upgrade Locally to this Parser Release](#)
- [Upgrade Remotely](#)

Upgrade Locally to this Parser Release

Before starting this procedure, verify that you are running the SmartConnector framework version 7.14.0.8241. Applying this parser AUP release update to any SmartConnector release earlier than 7.14.0.8241 is not supported by Micro Focus ArcSight Parser Upgrade 7.14.3.8270.0.

To upgrade locally to this parser release:

1. Download the appropriate parser release upgrade AUP file from the ArcSight Marketplace site (<https://marketplace.microfocus.com/arcSight>) at **Categories > SmartConnectors** or from SSO (<https://softwaresupport.softwaregrp.com/>).
2. Stop the SmartConnector.
3. To perform the parser upgrade, run the command:
arcsight parseraupupgradelocal [your_upgrade_to_parser].aup [your_ignore_warning_flag]

Where:

- **[your_upgrade_to_parser].aup** is the full path of the upgrade to parser AUP file (the file downloaded in step 1.) This file will be moved by the upgrade script. Verify that no other process is holding this file. Verify that the logged in user has both execute and write permissions for the selected directory.
- **[your_ignore_warning_flag]** is the true/false flag indicating whether you want to ignore the “Parser AUP has later version than the connector” warning
- 4. The connector will be started automatically after upgrade has completed.

Upgrade Remotely to this Parser Release Using ArcMC

Before upgrading, have the latest version of the *Micro Focus Security ArcSight Management Center Administrator's Guide* available for any questions.

Note: Updating the parser AUP with ArcMC requires ArcMC version 2.5 or later.

You can upgrade to the new parser release from ArcMC either directly from Marketplace using ArcMC or from your ArcMC repository. See the following sections for details:

1. From Marketplace Directly
2. From SSO or Marketplace, then Apply from the ArcMC Repository

From Marketplace Directly

Before starting this procedure, connector must be running. If you have not already done so, create your administrative account on the ArcSight Marketplace.

To upgrade directly from Marketplace:

1. Click **Node Management** in ArcMC.
2. In the navigation tree, navigate to the host on which the container resides.
3. Select the container to be upgraded.
4. Click the **Upgrade** button.
5. (If not logged into Marketplace) On the upgrade page, click on “Save ArcSight Marketplace User” to enter your Marketplace credentials. This is a one-time task, unless you need to update your credentials.
6. Under **Select Upgrade Type**, choose **Parser upgrade**.
7. From the **Select Upgrade Version** down-down list, select the **7.14.3.8270.0** (Latest) parser upgrade AUP file.
8. Click **Upgrade**.
9. Verify in the Details column, under “Parser upgrade file push status”, that the file was successfully pushed to the container. It signifies that the parser upgrade file was automatically downloaded to your repository. Status will show “Successful.”
10. Wait while connectors restart automatically.
11. Use the [Verify the Parser Version AUP in Use](#) procedure to determine the parser AUP file in use.

From SSO or Marketplace, then Apply from the ArcMC Repository

Prior to performing an upgrade of a container, you will need a connector AUP file of the new parser version in your ArcMC repository.

This is a two-part process:

- Uploading the parser release AUP file to the repository from Marketplace or SSO
- Applying the parser upgrade to all connectors in a container

Note: If the new parser release AUP file (7.14.3.8270.0) already exists the repository, go to the next procedure to apply the parser upgrade.

To upload the new parser release AUP file to your repository:

1. Download the parser release upgrade AUP file for the connector from the ArcSight Marketplace (<https://marketplace.microfocus.com/arcSight>) by selecting **Categories > SmartConnectors** or go to SSO (<https://softwaresupport.softwaregrp.com/>).
2. Log in to the ArcMC browser-based interface.
3. Go to **Administration > Repositories**.
4. In the navigation tree, pick **Upgrade Files**.
5. Click **Upload** from the management panel.
6. Click **Browse** and select the file you downloaded earlier. Click **Open**.
7. Click **Submit**. The file is uploaded.

You can now use the AUP upgrade file in the repository when you are ready to upgrade a container or containers to a specific version using the procedure.

To apply the parser upgrade AUP file to all connectors in a container:

1. Click Node Management.
2. In the navigation tree, navigate to the host on which the container resides.
3. Click the Containers tab.
4. On the Containers tab, select one or more containers to upgrade.
5. Click Upgrade.
6. On the upgrade page, under Select Upgrade Type, choose Parser upgrade.
7. Under Select Upgrade Version, from the drop-down list, choose the parser release AUP file version to which you want to use to upgrade the selected containers.

8. Click Upgrade. The upgrade is performed on all containers.
See "Upgrading All Connectors in a Container" in the *Micro Focus Security ArcSight Management Center Administrator's Guide* for complete upgrade instructions.

Roll Back to a Previous Version

Users can roll back to a previous version by using any of three methods suggested for upgrading:

1. Apply the previous version of parser AUP [locally](#).
2. Apply the previous version of parser AUP [directly from Marketplace](#)
3. Upload the previous version of the parser AUP to the ArcMC repository from SSO or Marketplace, then [apply from ArcMC repository](#).

Verify the Parser Version AUP in Use

The parser upgrade file in use can be verified in ArcMC or in the agent logs.

In ArcMC

1. Go to Node Management > View All Nodes.
2. In the navigation tree, navigate to the host on which the container resides.
3. Verify that value in the Parser Version column matches the version number of the recent upgrade.

In the Agent Logs

1. Find the agent.log file at: /ArcSight_Home/current/logs
2. Search for the latest occurrence of the line in the log file that contains "ArcSight Parser Version."
Example:

```
<CODE MAP: '7.14.0.8241.0.'>  
<ArcSight Connector Version: 7.14.0.8241.0.>  
<ArcSight Parser Version: 7.14.3.8270.0 >
```
