What's New

This version of the ArcSight Interactive Discovery project contains support for ArcSight Advizor 7.2.1. For a complete description of the tabs in the full and partial projects, see the *ArcSight Interactive Discovery Projects User's Guide* in the [Micro Focus Community](#).

Version 7.2.1

- **New Color Scales:** The list of built-in Color Scales has been expanded to include four new "Sequential" choices: Blue, Green, Orange, and Red. Each one transitions smoothly from a light to a dark shade for small to large values, and can be used effectively when coloring by a numeric, continuous field. The other choices have been pruned and categorized in the Color Scale drop-down list.
- **Color Legend Enhancements:** The Color Legend pane has been enhanced with textual metadata to make the context clear: it lists the color model used for the page, and which color scale is currently being mapped to which table and field's values.
- **Updated Desktop Chart Toolbars:** The collapsible toolbars for the charts have been rearranged to a more intuitive order that is more consistent with that of ADVIZOR Server AE.
- **Rollups Omit Missing Key Values:** Project authors who extract subsets of tables now have the option to omit the row that would otherwise be generated for Missing values in the key field.

For information regarding previous releases visit the [Micro Focus Community](#).

System Requirements

For supported AID installation platforms and minimum system specifications for installation and running the software, see the *Advizor Implementation Guide*, available in the AID download package.

For details on the supported versions of ESM or Logger, consult the Micro Focus ArcSight ESM Product Support Matrix, or the Micro Focus ArcSight Logger Support Matrix, available from the [Micro Focus Community](#).

Resolved Issues

This version of AID resolves the following issues:

- Dialogs and controls in the desktop applications now adapt correctly to high-DPI displays with scaled fonts.
- Map chart performance on basic displays has been improved.
- Bar Charts, Line Charts, and Pie Charts no longer display Focus details as the mouse is moved across a Data Sheet, Scatterplot, or Time Table.

- Counts charts with more than 5 lines of custom Grid Specifications do not display with the alternate gray background.
- Very small Text Filter charts no longer report a "LargeChange" error.

Known Issues

There are no known issues in this version of AID.

Deployment Tips

- Set the Default Color Table for a page (from the Author ribbon) appropriately so the Color Legend and Color Field drop-down list (on the Analyze ribbon) match the charts on a page.
- See the ADVIZOR Implementation Guide for instructions on how to upgrade ADVIZOR Server from an earlier version.

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this computer, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes (Arcsight Interactive Discovery 7.2.1)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to arcsight_doc@microfocus.com.

We appreciate your feedback!
