Actor Model Import FlexConnector for Database 7.0.7.7289

These release notes discuss the following topics.

["Overview" on page 5](#)

["Contents" on page 5](#)

["What's New" on page 5](#)

["Installing the Actor Model Import FlexConnector for Database" on page 5](#)

Overview

The Actor Model Import FlexConnector for Database for ArcSight IdentityView v2.52 provides a way to read and import identity information from SQL databases into the ArcSight ESM actor model. The connector uses database parsers to read and import the required identity information from one or more tables. The connector supports both time-based and ID-based database tables. The connector also supports CSV files.

Contents

The files included in this release are:

Table 1 Installed Files

File name	Description
FlexDBActor_Config_7.0.7.7289.pdf	Developer's guide
FlexDbActor_RelNotes_7.0.7.7289.pdf	Release Notes
ArcSight-7.0.7.7289.0-FlexDBActorModelConnector-Win64.exe	Installer for Windows 64-bit systems
ArcSight-7.0.7.7289.0-FlexDBActorModelConnector-Linux64.bin	Installer for Linux 64-bit systems

What's New

Updated support for Windows and Linux platforms.

Installing the Actor Model Import FlexConnector for Database

The Actor Model Import FlexConnector for Database is supported on Windows and Linux platforms. For detailed instructions about installing the connector, see the Actor Model

Import FlexConnector for Database Developer's Guide. The guide is available at:

Fixed Issues in this Release

This release contains the following fixed issue.

Number	Description and work-around instructions
CON-14924	The POODLE vulnerability in the SSLv3 protocol was present in previous versions of this connector. This release avoids any use of SSLv3.
