["What's New in this Release" on page 8](#)

["Installing the Asset Model Import FlexConnector" on page 8](#)

["Known Issues" on page 8](#)

Product Overview

The Asset Model Import FlexConnector allows you to develop a model import connector to import the asset model data from a file. This enables you to create and maintain ESM Network Model data, and keep this data in sync with the data in your Asset Management system. Based on configuration, files are read by the connector, converted to XML based on parser attributes. Upon generation, the XML files are automatically transferred by the connector to the ESM server.

Note

CSV is the only file format supported.

Supported Platforms

The Asset Model Import FlexConnector supports the following platforms:

- Microsoft Windows Server 2003 R2 (SP2), 64-bit
- Microsoft Windows Server 2008 R2, 64-bit
- Microsoft Windows Server 2012 R2, 64-bit
- Red Hat Enterprise Linux (RHEL) 5.5 AS, 64-bit
- Red Hat Enterprise Linux (RHEL) 6.5, 64-bit

Release Contents

The files included in this release are:

File name	Description
AssetModelImportConn_RelNotes_7.0.7.7287.0.pdf	Product descriptions and open issues (this document).
AssetModelImportConn_DevGuide_7.0.7.7287.0.pdf	<i>ArcSight™ Developer's Guide for Asset Model Import FlexConnector</i> — Provides instructions on how to install the connector for Asset Model Import and configure the SmartConnector.
ArcSight-7.0.7.7287.0-AssetModelImportConnector-Linux.bin	Installation executables for the SmartConnector.
ArcSight-7.0.7.7287.0-AssetModelImportConnector-Win.exe	

What's New in this Release

This release adds support for new platforms.

Installing the Asset Model Import FlexConnector

The Asset Model Import FlexConnector is supported for installation on Windows and Linux platforms. For detailed instructions about installing the connector, see the *ArcSight Developer's Guide for Asset Model Import FlexConnector*. You can download the guide from the same location from which you download the installation executable:

<http://softwaresupport.hp.com>

Known Issues

Number	Description
CON-10490	The externalId field is not used. Instead, the connector uses the AssetName field for name and externalId values.
CON-10491	The Alias field is not used. Any data entered in this field is ignored.
