**MICRO FOCUS®**

# Security Engage
## News, events, and updates
### April 2019
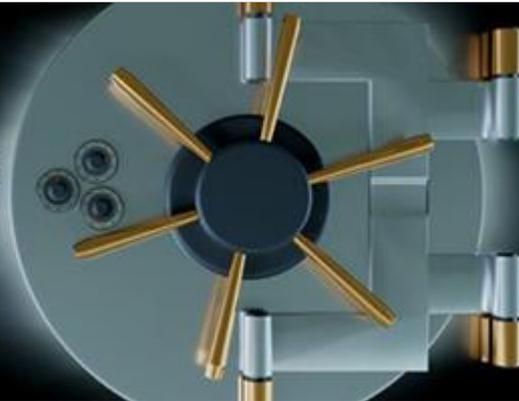

## In this issue:

## Engage at Our Events

### Micro Focus Cybersecurity Summit

Join us for the second annual Micro Focus Cybersecurity Summit, taking place **11-13 June** in**Dallas, TX**. Hear from peers and Micro Focus experts as they share best practices and solution roadmaps to help you take a holistic, analytics-driven approach to securing what matters most—identities, applications, and data. **Register now**

### Discover how SMAX delivers ESM at SITS 2019

While you're at the Service Desk and IT Support Show (SITS), Europe's leading event for IT professionals on **1-2 May** in **London** (free admission to those who preregister by 30 April), treat yourself to a one-on-one, info-packed demo of Micro Focus SMAX—recently named a Forrester ESM Wave Leader. **Book your demo now**

### Micro Focus NHS Customer Forum

Digital transformation is driving organizations to look at IT from more angles than ever before, leading them to realize that an effective strategy spans many different technology disciplines and

investments. Join us for the Micro Focus NHS Customer Forum in **London** on **9 May** to meet with peers from other NHS organizations and Micro Focus experts to learn how we can help with your journey to digital transformation. **Register now**

## 2019 FINRA Annual Conference

Mark your calendar for FINRA's Annual Conference 2019 to take advantage of a variety of sessions related to current trends in compliance, cybersecurity, risk management, and more. Register now for this event held in **Washington, DC**, from **15-17 May**. While you're there, be sure to visit the Micro Focus Information Governance team at pod 11 to learn about unified archiving for all your business communication data. **Register now**

## Fortify at SecureGuild online conference for Application Security Testing

Fortify is a Platinum sponsor of SecureGuild, an online conference dedicated security testing. Join in on **20 May** as Fortify's Jimmy Rabon presents "Do your Pipelines remember? They must if you want to go fast with static analysis." **Register now**

## Micro Focus REALIZE is headed to Australia!

Join us for this free, one-day software experience for business leaders and IT professionals on **28 May** in **Melbourne**, on **30 May** in **Sydney**, and on **4 June** in **Canberra**. Gain insight on how to address complex problems and realize smarter business outcomes through case scenarios and best practices, learn and connect on the latest innovations, explore our entire software portfolio, see product demos, get to know our trusted partners, and network with experts and peers in the Solution Showcase Zone. Meet with our executives and product experts for a personalized session.**Register now**

## Engage with Our Replays & Highlights

### Micro Focus Universe on Demand now available!

Universe on Demand is the digital platform of our largest annual customer event—Micro Focus Universe—which took place in Vienna, Austria on 26-28 March. Leverage the content shared onsite and get details about upcoming local events!

## Engage with Our Products

## Fortify is now a Diamond Sponsor for the OWASP OpenSAMM v.2

Fortify is excited be a sponsor of the OWASP SAMM (Software Assurance Maturity Model)—the prime maturity model for software assurance.

## Announcing File Dynamics 6.2

An expanded emphasis on data growth, automation, compliance, security, and protection are all contributing to evolving requirements for data management. To meet the dynamic demands of today's organizations, Micro Focus offers File Dynamics, an identity- and target-driven policy approach to today's network data management challenges.

With File Dynamics, you have the means to not only automate the provisioning, day-to-day management, archiving, and disposal of user and group network storage, but to manage all other unstructured data on the network. Additionally, File Dynamics provides the means to secure data through remediation and notification as well as protect data through point-in-time data recovery.

New to File Dynamics 6.2:

- **Storage Resources Scoping.** The Storage Resources panel in the Admin Client now contains an interface for the configuration of Storage Resource scoping. Providing a scope for Storage Resources can greatly improve the time to discover and rebuild the Storage Resources database.
- **Client-based Directory Services and File System Access.** All navigation and listing of Active Directory and live file system entries in the Admin Client are now performed directly by the Admin Client, using the logged-on user's credentials. Prior versions of the client redirected these requests through the Engine, using the user's authenticated credentials

## Announcing new releases for File Governance Suite: File Reporter 3.6 and File Dynamics 6.2

The Micro Focus File Governance Suite is a full set of file governance tools to help you address data governance challenges in your Microsoft Windows network. Comprising Micro Focus File Reporter and Micro Focus File Dynamics, the File Governance Suite lets you know what files you're storing, their relevancy, who has access to them, if any contain personal or confidential information that needs to be secured, and much more. Then it lets you establish policies that can manage, secure, and even recover your data.

- **Micro Focus File Reporter 3.6** inventories network file systems and delivers the detailed file storage intelligence you need to optimize and secure your network for efficiency and compliance. Engineered for enterprise file system reporting, File Reporter gathers data across the millions of files and folders scattered among the various network storage devices that make up your network. Flexible reporting, filtering, querying, and content analysis options then present the exact findings you need so that you can demonstrate compliance or take corrective action.
- **Micro Focus File Dynamics 6.2** provides extensive services to address the expanding requirements of network data management. Identity-driven policies automate tasks that are traditionally done manually, resulting in cost savings and assurance that tasks are being performed properly. Target-driven policies offer data migration and relocation, cleanup, notification of changes to access permissions, and protection from data corruption and downtime.

**Engage with the Community**

## ArcSight Community Initiatives on GitHub

The ArcSight community is currently working on several interesting open source initiatives. This includes building new features, adding new documentation for the portfolio from Software Development Kits, and much more. You can receive notifications on new releases and projects by following the project on GitHub!

## Engage with Our Enablement Resources

**New Security webinar library** – Check out our new Security webinar library on BrightTALK! Log in with your BrightTALK credentials or register for free.

**Webinar: How Proven AI Accelerates Your App Competitiveness** – As application vendors race to put artificial intelligence into their products to deliver differentiating value, they are often faced with the choice of whether to invest in homegrown technology. In this case, it is critical to holistically evaluate a partnership beyond just the technology itself to ensure sustainable success. Join this webinar on 1 May to learn about key criteria for evaluating an OEM partner, how Micro Focus addresses those criteria, and key resources for developers.

**Webinar: Micro Focus SecOps Innovation: A look into the future of security insights** – Join product and solution leaders from Micro Focus and partner Deloitte on 15 May to learn about the core capabilities required for successful SecOps within a modern landscape, including the latest innovations to support digital transformation roadmaps. Hear more about the future of ArcSight, see examples of successful customer journeys, and get an introduction to Interset for UEBA, our newest advanced analytics acquisition.

**Webinar: Data protection: Your biggest reputational risk?** – Your corporate reputation is one of your greatest assets, taking years to build and only minutes to lose. So what's the best way to protect it? Learn how you can safeguard your hard-won reputation against both internal and external threats and protect one of your biggest reputational risks: your data.

**Webinar: Discover Key Shifts in the Privacy and Data Protection Environment** – There is a lot more data at risk today than there has been in the past. The explosion of personal data being collected, harnessed, and used means that companies have to be increasingly aware of how they manage it. Additionally, there has been an expansion of global requirements such as the GDPR, California's CCPA law, and Brazil's LGPD law.

**Webinar: Ensure Privacy Protection through your Digital Transformation** – Privacy represents a major challenge for the modern enterprise. The flexibility of hybrid IT and insights of data analytics are essential to the business. But the digital transformation that is key to business success and competitive advantage is also a major vulnerability when it comes to data privacy. Organizations are rightfully concerned about CCPA, GDPR, PIPEDA, and the growing number of regulations now being enacted, which means they need to figure out how to reduce their risk. But current privacy protection approaches fall short. What's needed is a unified technology

framework that lets you take a holistic, analytics-driven approach to securing what matters most—a framework flexible enough to meet the needs of your enterprise, but specific enough to offer a guide to risk reduction. Join us for this informative webinar to discover why Micro Focus is a leader in providing this solution.

**Webinar: Close the Gap in Your Ransomware Defense** – Ransomware is a global epidemic that is spreading like wildfire. The FBI estimates that ransomware infects more than 100,000 computers a day around the world. Join this webinar to learn about ransomware challenges and impact, why malware detection alone is not enough, and how to close the gap with holistic endpoint data and device management.

**Webinar: Anatomy of a Breach** – Cyber breaches have almost doubled in the past five years, according to the World Economic Forum, which now lists cyberattacks as third on its list of top global risks. But how can organizations keep pace, keep secure? There needs to be a plan. One of the clearest, most comprehensive, flexible, and highly regarded approaches to cybersecurity is the framework devised by the National Institute of Standards and Technology (NIST). This webinar provides an overview of market trends facing organizations as they venture into a digital transformation and how they can make their digital transformation secure by employing the NIST framework to strengthen every facet of their organization's defenses against a breach.

**Video series: Fortify Unplugged** – This video series includes a deep dive into some of Fortify on Demand's most useful features:

- **Getting Started In AppSec in One Day**
- **Smart Fix Overview**
- **Reports**
- **Upload Tool**
- **Reviewing Static Scan Results**

## Engage with Industry Expertise

### Highlights from the 2018 Micro Focus Cybersecurity Summit

With our 2019 Micro Focus Cybersecurity Summit set for June, get the highlights of the 2018 Summit, which introduced our expanded security portfolio. Then make plans to attend this year! Get all the details in our new InfoSec blog… **Read more**

## Security, Risk & Governance recap from Micro Focus Universe

The SRG Forum at Micro Focus Universe attracted over 300 customers and partners this year. Presentations from top customers, Micro Focus experts, and partners focused on how to protect what matters the most: identities, apps, and data. Check out the event's highlights by the numbers… **Read more**

## Privacy and data protection, regulatory compliance—Yes, you can have it all

There's a lot more data at risk today than ever before. The explosion of personal data being collected, harnessed, and used means that companies have to be increasingly aware of how they manage it… **Read more**

## Connected car data targeted: How data security drives innovation

Here's how to scale data security at the pace of the IoT initiative and the speed your business demands… **Read more**

## 9 disruptive security plays from RSAC 2019

Here are nine exceptionally disruptive technologies from RSAC 2019 that might just turn the tide in security… **Read more**

## How machine learning bolsters your security operations

This is the future of security: You must include data science and—specifically—machine learning to elevate the level of predictability… **Read more**
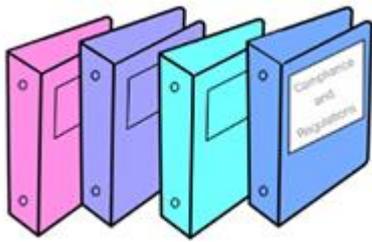

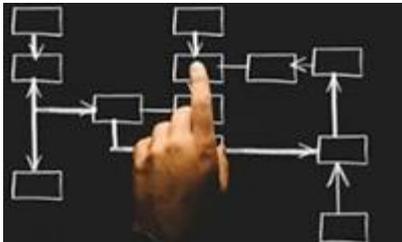

## Addressing governance and regulatory requirement

What are your thoughts on assessing governance and regulatory compliance? Have you participated in such an assessment? Did you follow a formally documented process, and if so, which one? Delve into the process of assessing your governance and regulatory requirements … **Read more**

## 32 application security stats that matter

The state of app sec by the numbers: Don't let your company become one of these statistics... **Read more**

## Developing a prioritized security strategy

In our last post, *Addressing Governance and Regulatory Requirements*, we described the third of six processes for implementing a data security practice. Here we present our fourth process: developing a prioritized security strategy... **Read more**

## The Good and the Bad in the Global State of Cybersecurity

The new Cyberthreat Defense Report form CyberEdge Group surveyed IT security decision-makers and asked them to share how they plan to improve their security posture and which technologies they see as essential weapons against cyberthreats... **Read more**

## Ransomware and Data

The goal of ransomware is simple: to hold your data hostage until a ransom is paid to its captor. The effects are devastating. The NotPetya ransomware attack is estimated to have cost businesses up to $10 billion. Its

sibling, WannaCry, tallied losses somewhere between $4 billion and $8 billion. The high cost of failure is preventable if businesses adapt and enforce these best practices… **Read more**

## Case study: Coca-Cola FEMSA chooses Fortify on Demand

When a move to hosting applications in the cloud prompted the need for more structured application security to identify vulnerabilities before they cause issues, Coca-Cola FEMSA turned to Fortify on Demand.

## The CCPA and Privacy: Data Protection & Identity

The California Consumer Privacy Act (CCPA) is the most consequential data privacy regulation yet to come out of U.S. initiatives. See an informative **infographic** on CCPA for key points to know. Read a concise **white paper** by PwC, discussing CCPA in light of GDPR. Consume these two newly added CCPA-related assets, along with Micro Focus Data Privacy solutions information, now collected on the **content portal**. CCPA becomes law on January 1, 2020!

## Flash point paper: Data Privacy: Keys to Keeping Your Corporate Data Secure

With the expanding number of different devices, apps, and operating systems that corporate workers use to get their jobs done, protecting corporate data grows harder and harder.

## White paper: Five Steps to Defend Your Company Against a Security Breach

The NIST framework has five parts, each of which provides a useful lens for evaluating your company's security. Download this white paper for an overview of the NIST framework and ways you can to use it to strengthen every facet of your organization's defenses against a breach.

## Flash point paper: Ransomware—Preventing Hostage Data

Cybercriminals take advantage of a vulnerability in your environment to infest your systems with malware that encrypts your vital business data so that it's unusable until you pay them to decrypt it. In some cases, they even steal the data and threaten to release it to your competitors or sell it to the highest bidder.
