Support Matrix

Micro Focus ArcSight Security products are a next-generation of data collection and storage engine that unifies log data collection, storage, and security data management in a scalable, high-performance software or appliance solution. This document discusses operating system (OS), appliance, browser, and other support details for Logger 7.0

Abbreviations Used in this Document

Abbreviation	Description
RHEL	Red Hat Enterprise Linux
OEL	Oracle Enterprise Linux
CentOS	Community Enterprise Operating System
IE	Internet Explorer
FF	Firefox
ESR	Extended Support Release (of Firefox)

OS Support Policy

- A **certified** operating system means that platform support has been tested and certified with regression tests for the SmartConnector version. ArcSight will accept support calls and address bugs for installations on the platform.
- A **supported** operating system means means that ArcSight has performed a general run-through to verify that the platform support works as expected. ArcSight will accept support calls and address bugs for installations.

ArcSight Logger

The following section describes operating system (OS), appliance, and browser support for both software and appliance form factors of ArcSight Logger. The type of Logger is indicated where there are differences.

Currently Supported Logger Versions

The following table lists the supported appliance models, operating systems, supported browsers, and upgrade paths for each currently supported Logger version.

An asterisk (*) next to a browser version indicates that the browser version supported is the one current at the date of release.

Caution: Upgrade your operating system (OS) during the Logger upgrade. When upgrading through multiple releases, don't skip the OS upgrade. For more information, see Release Notes for the upgrade version.
