Micro Focus welcomes Intersect to the security family—advancing analytics and insights across the enterprise

Micro Focus completes acquisition of Intersect to further expand CyberSecurity expertise. This latest acquisition brings Advanced Machine Learning and User and Entity Behavioral Analytics (UEBA) to an already-deep Security, Risk & Governance portfolio. [Read more](#)

Engage at Our Events

RSA® Conference 2019, San Francisco, 4-8 March 2019

RSA Conference 2019 is the place to be for the latest in cybersecurity data, innovation, and thought leadership. From **4-8 March, San Francisco** will come alive with cybersecurity's brightest minds as they gather to discuss the industry's newest developments. [Register now](#)

Save the Date: Micro Focus Universe 2019

Micro Focus Universe 2019, our premiere customer and partner event of the year, will be held **26-28 March** in **Vienna, Austria**. Deep dive into targeted content areas of your choice, while exploring other solutions that address a range of today's business challenges. Benefit from customer insights, product-expert discussions, and hands-on demos that address critical topics. [Register now](#)

FutureCon Dallas and FutureCon LA

Join us at a next-generation cybersecurity conference where you will discover cutting-edge security approaches for managing risk in the ever-changing cyber-threat environment. FutureCon Dallas takes place on **21 February** in **Dallas**, and FutureCon LA takes place on **27 February** in **Los Angeles**. Chat with our specialists to see how Micro Focus Security, Risk, and Governance solutions help you manage identities, secure applications, and protect data.

[Register now for Dallas](#)

[Register now for LA](#)

ARMA NYC Spring Conference

Join us for the ARMA NYC Spring Conference on **5 March** in **New York City**. Learn best practices for archiving and litigation readiness, data privacy and security, and regulatory compliance. Visit our booth to get your own personal demo of Secure Content Manager to learn how to discover, protect, and manage your most sensitive data. [Register now](#)

Micro Focus Technical Workshops—Helping you get the most out of your software investment

Micro Focus is proud to announce that we're hosting a special series of three-day technical workshops in **Glendale, CA USA** on **26-28 February**. Come for an in-depth technical discussion about recently released features and future product roadmaps, and then network with fellow users and senior Micro Focus staff to build connections and discuss solutions. The range of topics will help you get the most out of your installed Micro Focus software and enable you to plan for the future. Topics include: ZENworks Endpoint Management, File and Print, Collaboration, Identity, and Access and Security. These events have been designed with all users in mind. Detailed information about the agenda and location can be found on the registration page. [Register now](#)

Free trial: Retain Social Media Governance Solution

Try Retain Social Media Archiving free for 30 days and see how easy it is to keep archived data secure and compliant.

ZENworks 2017 Update 4 now available

Micro Focus is pleased to announce the availability of ZENworks 2017 Update 4. This release includes a broad range of features and enhancements for Mobile Management, Client Management, Imaging and Remote Management, Inventory, Asset Management, Endpoint Security Management, Full Disk Encryption, Patch Management, Platform Support, Reporting, and ZENworks Application.

Fortify Security Assistant

Find and fix security vulnerabilities in real time with the developer's security "spell checker."

Engage and Take Time

Complete a 10-minute Gartner Peer Insights survey for a \$25 Visa prepaid gift card!

Tell Gartner Peer Insights in this anonymous survey how Micro Focus helps you tackle cyber threats in real time with our Security software. Reviews are currently being accepted for **SIEM** and **Identity Governance and Administration**. Be one of the first 50 reviewers approved by Gartner and receive a \$25 Visa prepaid gift card (subject to reviewer location).

Engage with Our Enablement Resources

Webcast: [What's new in ZENworks 2017 Update 4 on-demand webinar](#) – Join the UEM Product Management team for this session and see how the improved client management capabilities of ZENworks 2017 Update 4 further your ability to better manage mobile devices. Learn more about the latest mobile device control settings; the distribution of Wi-Fi configurations on iOS and Android devices and Enterprise iOS Apps; mobile hardware inventory; locating a Windows 10 device; install schedules in bundles; updated application and storage device control in ZESM; and much more.

Webinar: Android Enterprise with ZENworks 2017 Deep Dive PART 1 and PART 2 – Do you know how Android Enterprise device management works in ZENworks? What a Work-Profile is? How you can manage a company-owned Android device? Join us for this two-part webinar where ZENworks architects will take you behind the scenes of what's actually happening during Android Enterprise enrollment with Google, how you enroll an Android device, how Apps gets distributed, and how you can enforce compliance with corporate security policy and control various device configurations.

Engage with Industry Expertise

For auto makers, data is the new fuel for analytics and innovation

With data pouring in around the clock from millions of cars on the road, auto companies are implementing data lakes to capture it all. But keeping this sensitive data secure and private for use in analytics is a major challenge for the automotive industry... [Read more](#)

Data Privacy Day – Protect what matters most

Data Privacy Day, which took place on 28 January, creates awareness about the importance of privacy and protecting personal information. Micro Focus Security urges businesses to manage and protect sensitive information and keep private data private... [Read more](#)

Data protection and global warming

With the drumbeat of data breach news and overwhelming pressure from new regulations, organizations can become desensitized to the urgency of protecting sensitive data at a data-centric level. Phil Sewell, Strategic Security Architect for Data Protection, recognizes certain parallels between data protection and global warming, and how we tend to think about the short-term and long-term costs and benefits of addressing a potential catastrophe... [Read more](#)

Protecting what matters most with some familiar faces at RSA

Come to the RSA Conference to see how to take a holistic, analytics-driven approach to securing what matters most—identities, apps, and data. Better yet, see the familiar faces behind our comprehensive InfoSec portfolio... [Read more](#)

The most pressing issues regarding application security

A survey by BizTechInsights reveals the most common factors that impact organizations' implementation and use of application security solutions, what they consider to be the most pressing issues regarding their application security solution, and other matters... [Read more](#)

GDPR execution will be a major task this year—and reap benefits

With solid data inventory, risk policy, and functionality, you can achieve GDPR compliance—and reap other benefits—through smart innovation. David Kemp explains what your team needs to know for 2019... [Read more](#)

11 expert takes on Data Privacy Day 2019 you need to read

The Council of Europe declared 28 January European Data Protection Day back in 2007; two years later, the U.S. joined in with the Data Privacy Day holiday. So, on this—the 11th Data Privacy Day—11 experts, including our own David Kemp, share their thoughts on Data Privacy Day in 2019... [Read more](#)

Modernizing breach defense for the manufacturing and automotive industries

Manufacturing and automotive industries need a comprehensive security strategy that incorporates security from the earliest stage of development all the way to the end of the product's functional life... [Read more](#)
