Micro Focus recognized on CRN's 2019 Security 100 List

CRN, a brand of The Channel Company, has named Micro Focus to its annual Security 100 list. The companies included on this list have demonstrated innovation and creativity in security product development, as well as a strong commitment to delivering those offerings through a vibrant channel of solution providers. Read the press release.

Engage at Our Events

Micro Focus Cybersecurity Summit

Join us for the second annual Micro Focus Cybersecurity Summit, taking place **11-13 June** in **Dallas, TX**. Hear from peers and Micro Focus experts as they share best practices and solution roadmaps

to help you take a holistic, analytics-driven approach to securing what matters most—identities, applications, and data. **Register now**

2019 FINRA Annual Conference

Mark your calendar for FINRA's Annual Conference 2019 to take advantage of a variety of sessions related to current trends in compliance, cybersecurity, risk management, and more. Register now for this event held in **Washington, DC**, from **15-17 May**. While you're there, be sure to visit the Micro Focus Information Governance team at pod 11 to learn about unified archiving for all your business communication data. **Register now**

Live webinar: Ensure Privacy Protection Through Your Digital Transformation – Privacy represents a major challenge for the modern enterprise. The flexibility of hybrid IT and insights of data analytics are essential to business. But the digital transformation that is key to business success and competitive advantage is also a major vulnerability when it comes to data privacy.

Organizations are rightfully concerned about CCPA, GDPR, PIPEDA—and the growing number of regulations now being enacted means they need to figure out how to reduce their risk. But current privacy protection approaches fall short. What's needed is a unified technology framework that lets you take a holistic, analytics-driven approach to securing what matters most—a framework flexible enough to meet the needs of your enterprise, but specific enough to offer a guide to risk reduction.

Join us for this webinar on **27 March**, to learn about:

- The attributes of a flexible, unified framework to address disparate regulations
- Five critical technology capabilities to enable compliance
- Data discovery and classification to manage risk
- Governing identity privileges, access, and stores

On-demand webinar: **Privacy: Discover, protect, and control access to data to lower privacy risk**– Ensuring the privacy of your customer information and IP is critical for protecting the lifeblood of your enterprise. But where to start? Micro Focus offers a comprehensive framework approach that maps products and technologies to each phase of your strategy. Whether you're just starting out with data discovery and classification to determine your risk or are ready now to apply controls and audit compliance, Micro Focus security, risk and governance solutions scale to meet your needs—each step of the way. Begin to unlock new business value safely and lower the risk of abuse or loss when your data is in the hands of trusted users and applications. In this webinar, we'll provide an overview of privacy solutions that illustrate how you can begin your journey!

On-demand webinar: **How to Get Started with a Seamless Application Security Program** – Learn more about the current state of software and application security, how to create or improve your AppSec program in a day, why integration is essential for speed, and why it is essential to go beyond the OWASP Top 10.

Video: ArcSight Data Platform Transforms Data Chaos into Security Insight

Micro Focus ArcSight Data Platform (ADP) brings order to the modern mess of complex data sources and data consumers. ADP's Smart Connectors can collect, normalize, and enrich data from over 400 devices and then distribute that data (through the highly scalable Event Broker) to your SIEM, data lakes, analytics tools, and more.

White paper: Protecting Security Analytics with an Audit Quality SIEM Solution

ArcSight not only provides dependable, litigation-quality data—both in transit and at rest—but also enables data privacy compliance across the threat analytics ecosystem through its integration with Voltage Format-Preserving Encryption.

Survey: Trends in Cloud Data Security: The Data Perimeter of Hybrid Clouds

To get more insight into trends in cloud data security, the Enterprise Strategy Group surveyed 392 IT and cybersecurity professionals responsible for evaluating and purchasing hybrid cloud security technology products and services, with these goals in mind:

- Examine the impact of cloud, mobility, and regulations on data security priorities.
- Gain insight into top data security challenges and the rate of data loss from the cloud.
- Determine the degree of separation between unified approaches for cloud and on-premises data assets.
- Understand data security spending intentions and priorities.
