Engage at Our Events

RSA® Conference 2019, San Francisco, March 4-8, 2019

RSA Conference 2019 is the place to be for the latest in cybersecurity data, innovation, and thought leadership. From **March 4-8, San Francisco** will come alive with cybersecurity's brightest minds as they gather to discuss the industry's newest developments. **Register now**

Save the Date: Micro Focus Universe 2019

Micro Focus Universe 2019, our premiere customer and partner event of the year, will be held **March 26-28, 2019** in **Vienna, Austria**. Deep dive into targeted content areas of your choice, while exploring other solutions that address a range of today's business challenges. Benefit from customer insights, product-expert discussions, and hands-on demos that address critical topics. **Register now**

Engage with our Replays & Highlights

Highlights from the 1st annual Micro Focus Cybersecurity Summit

Missed it? Don't worry. You can get the highlights from this event that took place in Washington, DC, on September 25-27, 2018. Take a look at Connect-Converge Magazine, best of 2018 edition, to see how we enable you to protect identities, apps, and data.

Engage with Our Products

New Fortify Software Security Content (2018 Update 4)

Fortify Software Security Research (SSR) is pleased to announce the immediate availability of updates to Fortify Secure Coding Rulepacks (English language, version 2018.4.0), Fortify WebInspect SecureBase (available via SmartUpdate), and Fortify Premium Content.

Voltage SecureData for Vertica - Prevent Hackers, Headlines, and Headaches

The Voltage SecureData Add-on for Vertica brings a unique data-centric approach to the encryption of data in Vertica, preserving sensitive information end-to-end, from the moment of capture, through business analysis applications, to the backend data store.

Engage and Take Time

Complete a 10-minute Gartner Peer Insights survey for a $25 Visa prepaid gift card!

Tell Gartner Peer Insights in this anonymous survey how Micro Focus helps you tackle cyber threats in real time with our Security software. Reviews are currently being accepted for **SIEM**, **Privileged Access Management**, **Mobile Application Security Testing**, **Identity Governance and Administration**, and **Access Management**. Be one of the first 50 reviewers approved by Gartner and receive a $25 Visa prepaid gift card.

Engage with the Community

4 Things You Should Know about the New Micro Focus Community Site

Your user experience on the Micro Focus Community site just got a whole lot better. Check out what's new!

Best practices and accepted solutions in the ArcSight community

Find "how to" and best practice recommended solutions from other ArcSight community members. Be part of it!

Engage with Our Customer Successes

RZZ Rechenzentrum AG

RZZ Rechenzentrum leverages Micro Focus® ZENworks® Configuration Management to efficiently deliver software to a global workforce, while maintaining control of licensing costs.

Webcast: Secure your Big Data Analytics for GDPR Compliance – Learn how Voltage SecureData for Vertica enables trusted big data to move between untrusted environments. This combined solution allows data protection to persist as data moves from storage, to in-flight, to in-use without requiring changes to downstream applications.

Webinar: How to get started with a seamless application security program – Learn more about the current state of software and application security, how to create or improve your AppSec program in a day, why integration is essential for speed, and why it is essential to go beyond the OWASP Top 10.

Engage with Industry Expertise

The state of IoT security: OWASP Top Ten highlights challenges

OWASP's new Top Ten list of IoT Vulnerabilities highlights continuing challenges. Here's the state of IoT security— and what to expect in 2019… Read more

Don't let ransomware ruin your business

Everyone has heard of WannaCry and NotPetya, two of the most devastating ransomware attacks in history. But why were these attacks so devastating? See our new endpoint management blog for answers… Read more

Ensuring Endpoint Governance for today's digital workspaces

There are five steps IT teams need to go through to enable a digital workspace for users, all of which have to be done under the umbrella of endpoint governance… Read more

Whitelisting, blacklisting, and your security strategy: It's not either-or

Here's what you need to know about whitelisting and blacklisting, with tips for which approach might best complement your security strategy… Read more

Making your application security program seamless

Success with Seamless Application Security takes time and effort, but the biggest hurdle to overcome is the culture change needed to include security throughout the entire software development lifecycle… Read more

Applying Access Management to your API strategy

As organizations continue to participate deeper in the growing API economy, they run the risk of taking a siloed approach to securing their APIs. Micro Focus Access Manager enables organizations to build a security layer around their most important and vulnerable digital assets… Read more

Security Progress: One step at a time

In this *Innovation in Government* article by Carasoft, Micro Focus Government Solutions' Rob Roy discusses how modernization shines a light on alternatives to all-or-nothing approaches to encryption and cyber strategies… Read more

Engage Our Resources

Report: The State of Application Security in the Enterprise

A survey of 538 technology influencers and decision-makers by BizTechInsights on behalf of Micro Focus reveals the most common factors that impact organizations' implementation and use of application security solutions.

Video: Seamless Application Security: Security at the Speed of DevOps

Application development at DevOps speed doesn't mean sacrificing security and putting your business at risk. Learn how Fortify helps you keep up with the business demands for rapid development with seamless application security.

Case study: Netstal

Micro Focus solutions such as ZENworks support an ambitious digital transformation project to deliver both continuous innovation and legislation compliance.

White paper: A Single Global Privacy Framework for Risk Reduction & Value Creation

Discover and classify sensitive data to manage risk, protect data, and enforce identity-based access for applications and users—and comply with privacy mandates with confidence and trust.
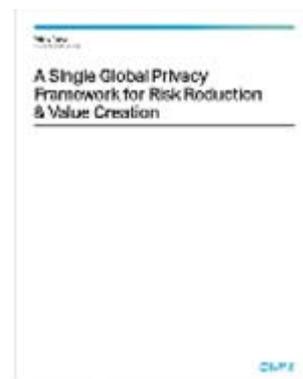

Report: TDWI Insight Accelerator | Protecting, Securing, and Governing Data in Analytics Workflows

One issue could bring analytics in your organization to a halt: the inability to properly secure, protect, and govern sensitive data. Read this new report from TDWI Research to learn how to keep your data secure.

White paper: PCI Technical Assessment for Voltage SecureData Web

Respected QSA Coalfire describes the Voltage SecureData Web solution and the particular requirements it addresses within PCI Data Security Standard (DSS) scope. The solution is designed to increase the security of e-commerce platforms without impacting the buyer experience and to reduce merchant PCI scope.

Guide: A Developer's Guide to the OWASP Top 10 – 2017

Check out this guide for an overview of each of the 2017 OWASP Top 10 application security risks and practical tips for writing secure code. It also provides sample code snippets and easy-to-follow remediation guidance to help you improve the security of your applications.

Real-time correlation with Micro Focus ArcSight

Detection is the first step in any security event, and one of the most effective detection tools is real-time correlation. ArcSight's powerful correlation engine tracks thousands of events per second to reduce your risk and enable your analysts to complete more thorough investigations.
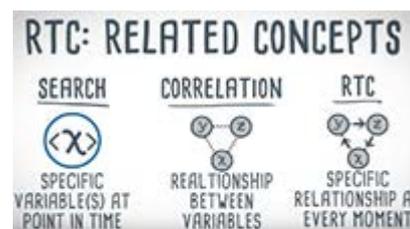

Don't forget to check our **Security Events & Announcements** page for security news, videos, and upcoming events.
